

This is short link-list for «Latlon.org OSM Belarus» lightning talk on SOTM EU 2011

<http://latlon.org> is OSM Belarus playground and development server.

Lots of things, some are hidden:

<http://latlon.org/maxi> – all the layers that can be plugged into OpenLayers and have Belarus;

<http://latlon.org/pt> – public transportation overlay, has bus/tram/trolley/sharetaxi routes and stops;

<http://latlon.org/v/lonely> - «lonely places» validator, places without roads;

<http://latlon.org/v/traces> – OpenStreetMap traces rendered as tiles and updated on-the-fly;

<http://userscripts.org/scripts/show/106614> – userscript for extended traces information;

<http://latlon.org/buildings> – 3D buildings from OSM database

<http://kosmosnimki.ru/3d-buildings/> - 3D OpenStreetMap rendering in browser

<http://code.google.com/p/osmtride/> - source code for the above rendering engine (in haxe)
